MODERN WATER
A Metir plc Trading Company

Microtox® Reagents

Use Microtox® reagents to deliver consistent reliable results. Setting the standard in reagents since day one.

Modern Water's Microtox® technology has provided laboratories with **proven, cost-effective solutions** to protect drinking water supplies, ensure compliance with regulatory standards, and support research for nearly 40 years.

Multiple independent scientific studies have documented Microtox®'s performance as an **effective toxicity screening tool across a wide range of applications**.

Microtox® LX and Microtox® FX analysers are designed to deliver **fast, accurate and reliable results** when used with Microtox® reagents and consumables. Using third-party reagents may result in unreliable data.

MODERN WATER
A Metir plc Trading Company

Only genuine Microtox® reagents and consumables:

- Are made to the original specifications that guarantee high quality.
- Are manufactured in a certified ISO: 9001 quality system.
- Are optimised to work with Microtox LX and FX brand analysers.
- Are backed by over 500+ peer reviewed studies.
- Are supported by a global network of application engineers, scientists and fully trained distributors.

Use with the Microtox® range

Only official Microtox® products will give you the guarantee of quality and the trusted results you expect.
